## Terminologies and calculations

Net CR: Net cumulative return if, bought on 2010-01-01 and sold on 2023-05-13

Avg CR: Average cumulative return, this is the average cumulative return of every day in the period

Net Return: Net return in dollars if the stock was bought at open price and sold at close price for the whole period

Daily Vol: Daily volatility of the stock

Annual Vo: Volatility of the stock over an year (Daily Volatility x Square root of 252)

Overall Vol: Volatility of the stock for the whole period (Daily Volatility x Square root of total working days in the period)

Max DD: Maximum of daily Maximum drawdown i.e. if the stock traded daily at open and close prices

Max DD2: Maximum drawdown if the stock was bought at the start and sold at the end of the period

Sharpe Ratio: Daily sharpe ratio for the stock

An. Sh.R.: Annual sharpe ratio

Overall Sh.R.: Overall sharpe ratio for the whole period

Sortino Ratio: Daily sortino ratio for the stock

An. Sort.R.: Annual sortino ratio

Overall Sort.R.: Overall sortino ratio for the whole period
